

# ECLIPSE PACKAGED BUTTERFLY VALVES

## **Packaged convenience and simplified setup.**

The Eclipse Packaged Butterfly Valve incorporates an Eclipse Trilogy T500 Series Actuator mounted to a standard Eclipse butterfly valve. This package is the perfect solution for industrial burner and damper control. Eclipse makes selection and ordering simpler in this single source component purchase. Equipment sizing, mounting and setup are all made easier.

## **Ready for the World**

The Packaged Butterfly Valve is approved for installation around the world. It meets applicable U.S.A., Canadian and European standards. It is available with RC or NPT threads and is supported by Eclipse service around the globe.

## **Precise and Robust**

For applications requiring modulating precision and repeatability, the Packaged Butterfly Valve is an excellent choice. The quality construction of the T500 Rotary Actuator provides reliable operation and delivers ample torque. It is IP66 / NEMA 4 rated and it can be installed in outdoor applications.

## **Actuator Options**

Two actuator models are available in 110 volt and 220 volt versions.

**Model T510 Basic**, to be driven by:

- a single relay contact for 2-position control
- dual relays for 3-position step, 3PS, 3-point step or bumping control

**Model T520 Electronic**, to be driven by:

- 4-20mA analog signal
- 2-10VDC analog signal
- 135 ohm potentiometer

## **Simplified Burner Control Solution**

**Offered By:**

Power Equipment Company
