

ECLIPSE TURBO BLOWERS SERIES "SMJ"

- High efficiency
- Heavy gauge steel base and housing
- Aluminum impellers balanced statically and dynamically
- Matching air filters available
- Changeable outlet positions

Eclipse "SMJ" Blowers are centrifugal blowers that provide low pressure air for industrial combustion systems. They are also used for cooling, conveying, drying, liquid agitation, smoke abatement, vacuum cleaning, fume and dust exhausting, and other applications where air temperatures are under 220°F (104°C).

All "SMJ" Blowers are constructed of continuous welded, heavy gauge steel. The impellers are made of lightweight, high strength, riveted aluminum. Outlets on 3" and 4" models are threaded, while all others are flanged for a standard 125# ANSI companion flange. Discharge ports are sized to keep pressure losses within reasonable limits.

Blower inlet flanges are equipped with a grill that complies with OSHA regulations. If desired, the grill may be removed and the inlet bolted to a standard ANSI companion flange. Eclipse-supplied motors are standard shaft and starting torque, ball bearing, 3600 rpm units. On any blower requiring 3/4 HP or more, Eclipse recommends that polyphase motors be used.

There are four possible outlet positions. Any existing position is easily changed by removing the housing from the blower base and remounting it in the desired position. Posi-

tions 1 through 3 can be specified for any blower. Position 4, however, requires factory approval before ordering. Position 1 is the standard assembly (bottom, horizontal) unless otherwise specified.

"SMJ" Blowers can be supplied with counterclock-wise (CCW) or clockwise (CW) rotation as viewed from the motor side. CCW rotation is furnished standard unless otherwise specified.

Outlet Positions

Model Variations

Type "D"
A.M.C.A. Arrangement #8

Type "D" construction features a separate impeller shaft connected to the motor shaft by a flexible coupling. It is often used where immediate interchangeability of motors is required (photo shows inlet filter installed).

Type "P"
A.M.C.A. Arrangement #1

Type "P" construction permits the blower to be driven by a gasoline engine, line shaft or other separate power source.

Type "V"
A.M.C.A. Arrangement #9

Type "V" construction is normally used when 60 cycle AC current is not available and motor speeds result in less than standard rpm. The V-belt drives the impeller at standard rpm regardless of motor speed.

Air Inlet Filters

Filters must be ordered separately.

Pressure Switches

Model AA-A2-6
Bulletin I-354

Eclipse-Dungs Air Pressure Switch

Model A2 is available in a wide selection of setpoint pressure ranges for a maximum pressure of 7 PSI (498 mbar). This pressure switch is CSA certified, FM approved and UL listed. Its calibrated blue knob provides easy and accurate adjustment. A 1/4" N.P.T. high pressure air inlet connection is located on the switch bottom.

Round Filters

Catalog Number	As-sembly Number	Blower Inlet Size	Max. Capacity	
			SCFH	m3/hr.
25FAJ-S	200758	4"	25,000	707
25FAJ-M	200757	6" & 8"	25,000	707
50FAJ	200756	6" & 8"	50,000	1,413
150FAJ-S	200754	6" & 8"	150,000	4,248
150FAJ-M	200755	10" & 12"	150,000	4,248
250FAJ-L	200753	10" & 12"	250,000	7,065

The discharge pressure of the blower will be reduced by approximately .15" w.c. (.37 mbar) with the filter assembly installed.

Pressures are corrected for an air inlet temperature of 70°F (21°C) and a barometric pressure of 29.92" Hg (1.01 bar).

*Greater flows available at reduced pressure. See blower curves for details (Data 610).

¹D=open motor; E=enclosed motor. Horsepowers with no letter suffix are either open or enclosed.

²Refer to the base chart on page 4 for base mounting dimensions.

³Signifies an N.P.T. threaded outlet. All other blowers have flanged outlets with standard ANSI 125# bolt patterns. All inlets are flanged. Companion flanges are not standard, but are available at a nominal cost.

To Order: Specify blower catalog number, CW or CCW rotation, motor HP, open or TEFC, voltage and frame size.

Dimensions & Specifications – Metric Units

Base*	Dimensions (mm)						Bolt Dia.
	L	M	N	P	Q	R	
1	197	248	254	124	229	98	14
